
(a) Macroscopic Atomic Drop
(b) Microcavitation Channel
$E_\gamma \approx \tau_{\text{bulk}} \cdot A_{\text{chan}} \cdot \Delta r$
$\Delta r = r_n - r_m$
Nucleon
Electron
r_m
r_n
$E_\gamma = \int \delta\tau \, dV$
A_{chan}
Extruded Photon ($c_{\text{P}} \approx c_{\text{E}}$)
Neutralization Funnel
FCC Lattice (c_{E}^2)
